Thickness	6,5 mm
Weight	850 g/m ²
Dimensions	22 m x 1,37 m

Lay more metres in less time!

Egalsoft® is a unique self-adhesive carpet underlay, allowing for sustainable and convenient application. The top layer consists of a PES non-woven fleece on an impregnated needle felt for a stable base when applying the glue. The equalising bottom layer has a self-adhesive non-slip bottom layer.

Egalsoft® is suitable for residential and project applications. For heavy-use applications, please lay Egalsoft® on non-slip glue.

- Since 1993, millions of square metres of Egalsoft® carpet underlay have been used hassle-free in many homes – more than 20 million square metres!
- The benefits of Egalsoft® are clear when you lay it. The self-adhesive non-slip bottom layer saves not only litres of glue, but also your completion time as it reduces your work.
- You can cover more metres in less time! Removing it is also quick and easy. The carpet and the Egalsoft® are removed in one movement.
- Various notable, leading projects, including hotels, ships and casinos, both at home and abroad, have been fitted with Egalsoft®.
